THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE  
OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793  
AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVEL-  
ATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON  
IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The military airfield is located about 4 km southeast of Sartichala (41°43' N/45°11' E), Georgian S.S.R., just south of a river. A hard surface road about 8 meters wide connected the field with Sartichala, and an unpaved road led to Tiflis (Tbilisi) (41°42' N/44°45' E). The field, about 1x2 1/2 km, had no concrete runway, taxiway or boundary lights.
2. Buildings at the field included two three-story barracks buildings, each 12x30 meters; a machinshop, 3x12x25 meters, where Diesel engines were repaired; an administration building 4x30 meters; and two hangars, including a U-shaped 10x50x30-meter repair hangar in which there were also class rooms, and an 18x30x50-meter hangar, called "influghalle" (test hangar), which was occupied by aircraft.
3. About 30 to 40 twin-engine bombers were parked on the northeastern edge of the field. Description: low-wing monoplane with two in-line engines, full view cockpit, one plexiglass turret on top of and one under the fuselage, landing gear retracting rearward with a half turn of the wheels, rigid tail wheel. Take-offs, landings, formation flying with about 12 to 15 planes, and parachute jumps were practiced daily.
4. Some of the officers resided in Sartichala, and some in small wooden houses in the vicinity of the field. The commander of the field was an air force general who lived in Sartichala. Most of the student pilots were about 18 to 20 years of age.
5. Air force soldiers said that the field was to be improved and used for training purposes. Jet planes were expected to arrive by the end of 1947.
